Henok Emyaye

Full-Stack Web Developer

SUMMARY

Full-stack developer with 3+ years of hands-on experience building scalable, user-friendly web applications with React, Next.js, Node.js and Python frameworks. Contributes to open-source projects for the Ethiopian Orthodox community and publishes his own developer tools, including an Ethiopian-calendar date picker for React. Focused on clean UI, web animation, SEO and performance, and on working with modern AI tools and agents.

EXPERIENCE

Front-End Developer · Nehemiah (EOTC) Open Source Community 08/2025 – Present

- Build and improve full-stack applications with community contributors, focusing on the frontend.
- Contributed to the launch of the EOTC Bible web app.
- Handle API integration, UI implementation and SEO optimization.

Full-Stack Developer · Car Rental App (side project) 03/2026 – Present

- Designed and built a booking system with vehicle filtering, vehicle management and reservations.
- Built and integrated backend APIs and payment methods.
- Improved the UI experience and delivered the product as a SaaS solution.

Full-Stack Developer · Solomon Habeshan Clothes, Addis Ababa 03/2024 – 07/2024

- Improved site performance and UX with responsive design and optimized product listings.
- Integrated Chapa payments.
- Built features in clean, efficient Next.js code.

Front-End Developer · Infinite Solutions, Remote 01/2022 – 06/2023

- Built and maintained responsive web applications with React.
- Integrated APIs and improved system performance.
- Optimized UI components for speed and scalability.

PROJECTS

EOTC Bible Web App Next.js, TypeScript · Live

- Frontend of an open-source Bible app for the Ethiopian Orthodox community, with 12 stars and 15 forks on GitHub.
- Secure JWT authentication using httpOnly cookies, server-side proxy routes and middleware that protects private pages.

Anágnosi Document Reader TypeScript, Vite · Live

- Chrome and Firefox extension plus web app that opens Word, Excel, PowerPoint and RTF files in the browser.
- Parses files locally with no upload, lazy-loads each format's parser, and adds an outline sidebar, full-text search, reading stats and four themes.

Ethiopian Date Picker (ShadCN) React, Tailwind CSS · npm

- Published an open-source React component that shows Ethiopian and Gregorian calendars side by side, with optional Ge'ez numerals.
- Built on the kenat calendar library and documented for use in any React or Next.js app.

Church & Feasts Next.js, Prisma · Live

- Multilingual web app that helps Orthodox believers find churches and the feasts they celebrate.
- Includes a Prisma-backed data layer and its own API routes.

Amazing Gear JavaScript (canvas) · Live

- Browser game built on the canvas API, with keyboard controls and sound; 6 stars on GitHub.
